

Rebuttal to Argument Against Measure G

Don't be misled!

As Brea business, education and civic leaders who know strong schools make a strong community, here are the facts and why we're voting YES:

- **Measure G is specific and accountable.** Each school was assessed for **important upgrades, repairs, and safety concerns**. Measure G funds the detailed **School Facilities Master Plan**, developed with input from teachers, parents and the community. **Independent citizens' oversight and audits** ensure funds are spent as promised.
- **No other funding exists to complete upgrades our schools need.** Taking from instructional funding is irresponsible. **Without Measure G, Brea schools continue to age, serious school safety and security needs go unaddressed**, and improvements only get more expensive.
- **The Orange County Taxpayers Association certifies Measure G is fiscally responsible.** Measure G's short-term bonds minimize interest and costs the typical Brea homeowner less than \$20 per month.
- **Measure G captures our fair share of state matching funds.** State funding for facility improvements requires local matching funds. Brea has missed out because we've not passed a measure to provide the local match. Without Measure G, Brea could miss out on \$30,000,000 that will go to other communities.
- **Brea students deserve the same modern classrooms, labs and career technical education facilities as other students in Orange County.** Measure G updates Brea schools so our students can compete.
- **Improving schools strengthens home values by increasing demand.** Measure G is not only an investment in Brea students, but in our homes.

It's time to stand up for Brea students. Vote YES on G for strong schools and a strong Brea.
